HE WENT THE PACE

Young David Manuel A Spendthrift.

SO SAYS HIS BROTHER

Asks Court to Have Guardian Appointed for Him--Goes to Coast Today.

David Manuel is a very rash young man, judging from the statements made about him by his brother in a case filed in the Circuit Court yesterday. A short time ago young Manuel came into a fortune of between \$12,000 and \$15,000. He was just twenty-one and he started right out to show his independence and to have a hot time while the money lasted.

First he sold for \$4000 a piece of property worth much more than that and with this ready cash at hand he began to spend it as fast as he could in Honolulu. It is not difficult for a good looking young man with lots of ready cash to find those who will help him do this and Manuel, for the past month or so has been living high, putting out about a thousand dollars of his patrimony each month. But little he recked. There was more where the first few thousands came from and life was mighty pleasant when there was always plenty of gold to jingle in his pockets and there were lots of things to buy that he had not yet bought.

But Manuel had a brother who was more far seeing than he. Antone Manuel, this long-headed brother, watched David's doings with dismay and sorrowed for the good cash that was being distributed about the city so liberally and to so little purpose. Arguments failed to move David and so did entreaties and in despair Antone turned to a lawyer to see what could be done to save his erring brother from thus wasting his substance in riotous living. For he realized the little fortune would not last forever, when David began to hit the \$100 pace, and he remembered the husks of repentance which must follow.

Antone talked it over with J. A. Magoon and he was advised by him to have a guardian appointed for his brother. This seemed a good idea to Manuel and he at once applied to the Circuit Court for the appointment of a guardian for David. In his petition Antone states that David Manuel is twenty-one years of age and unmarried, and that he owns property valued at \$5000 and has money in deposit with J. A. Magoon amounting to \$1000.

Recently says Manuel his brother sold a valuable tract of land for about \$4000 and has been spending and squandering the same and has contracted debts against his personal credit amounting to about \$1000 and on account of excessive drinking and idleness has spent and is spending and lessening his estate so as to expose himself to want.

When the idea that a guardian should be appointed for him was first suggested to David he said he did not mind but when he learned that this would take from him his right to do with his property as he chose it put a different face on matters. He was having too good a time to be stopped thus rudely in the middle of his career and he raised a vigorous kick. But it availed little and the proceedings were begun in accordance with the prayer of his brother.

Today David Manuel will leave on the Australia for the Coast. His brother Antone will accompany him, but before Antone leaves he will give directions to have the proceedings to have David declared a spendthrift continued in the courts.

David will take a goodly lot of ready cash with him when he leaves and he proposes to have as good a time as San Francisco can afford.

THEY STUDY AND PRAY WITH FERVOR

Young Men's Christian Association Membership Steadily Grows.

The entry blanks and advertising matter of the Young Men's Christian Association field day to be held at Punahou next Saturday week are being extensively circulated. The events listed are as follows:

50-yard dash, 100-yard dash, 220-yard dash, 440-yard dash, 880-yard dash, 120-yard hurdle, 220-yard hurdle, pole vault, shot put, 12 lbs., running broad jump, running high jump, running hop, step and jump, standing broad jump.

Silver and bronze medals will be given for each event. The entry fee is twenty-five cents for each event. Association members fifteen cents for each event. Entry fee must accompany entry blank. Entries close October 10th at noon.

The committee on handicapping is as follows: C. H. Cooke, chairman; C. A. MacDonald, E. B. Turner, W. W. Williamson, C. A. Elston.

The Junior Gymnasium class commenced yesterday afternoon and will be held every Monday and Thursday at 2:30 p. m. The attendance in this class will be over twenty.

The indoor baseball season was opened last Saturday evening with a game between scrub teams. The Business Men's team will play the Evening Class team next Saturday evening at 7:30 o'clock.

The work of getting the Punahou track into shape for the field day will be begun at the latter end of the week. Mr. Coats, the physical instructor, wishes it stated that in the coming athletic contests each man is expected to compete for himself and he is desirous that no club feeling be manifested. The Devotional, Beginners and Evangelical classes began on Sunday after-

noon with a total attendance of twenty-eight, which is a considerable increase from last term.

The Personal Workers' bible training class will commence next Friday evening at 6:30 o'clock.

The Soldiers' class at Camp McKinley is meeting with good success. The class gathers at 10 a. m. and is personally conducted by Secretary Coleman.

The directors of the Association met last night and elected over sixty new members. The regular routine of business was carried out.

Only a Mole Cricket.

On examining the bug which Judge Wilcox reported was playing such havoc with the banks of his taro patches, Prof. Koetle discovered that the insect is nothing more than the "mole cricket," or gryllotalpa africana, as the entomologists love to call it. It is a comparatively harmless insect which lives on worms chiefly, and burrows very rapidly through the earth. It does no damage to vegetables or plants and it causes annoyance chiefly from the fact that it burrows through the little dams in the taro patches and causes them to leak.

THEY WILL MOVE TO PROGRESS HALL

Young Women's Christian Association's Permanent Quarters.

The Young Women's Christian Association will move from their present location next week to the third floor of Progress Block. Permission has been obtained to use Progress Hall for the purposes of a gymnasium.

In the new headquarters there will be a spacious parlor and a kitchen as well as a sitting or reading room. The Association will take possession of the place next week and will signalize the same by a big opening reception when the work to be done during the coming season in the musical, literary and physical departments will be outlined.

The Travel club will meet this evening in the Association rooms at 7:30 o'clock and continue the study of "Holland." The attendance of this club is steadily increasing and much enthusiasm is being displayed. Last week twenty-two were present.

Miss Reynolds, the secretary of the World's Young Women's Christian Association passed through here last week on the Nippon Maru. She was met by some of the members of the Association and shown around the town. Miss Reynolds expressed her pleasure at finding the local branch of the Association in such flourishing condition. Before leaving, the visitor was fairly loaded down with leis.

Miss Reynolds expects to return to the Coast in April and it is possible that she will stay over for two weeks and deliver a series of talks on Association work and her travelling experiences.

Miss Lillian E. M. Bacon, the physical directress of the Association, is very busy arranging for the coming season's activity; under her guidance the work done promises to rival that of the Young Men's Christian Association.

WORK BEGUN ON OUTFALL SEWER

Oceanic Steamship Co. Must Pay for Dockage in the Future.

By an arrangement with Vincent and Belser, the contractors, the work of completing the sewer outfall will be completed by them by day labor, the Public Works Department having the supervision of the work and one of the Government engineers acting as engineer in charge. This matter was brought up in the meeting of the Governor's council yesterday morning by Supt. McCandless.

He said he had rejected all of the bids for the completion of the work and that the Public Works Department would take charge of it, as was announced some days ago by the Advertiser. According to the arrangement with the firm of contractors they are to receive 15 per cent on the day labor employed. F. B. Edwards will be the superintending engineer. Work was begun yesterday with the "clamshell" dredger, experimenting in the harbor and active work on the sewer will start as soon as possible.

The Oceanic Steamship Company will in future have to pay for its dockage and water rent and coal storage space. Since 1896, when the company secured a mail contract with the Hawaiian Government, it has been securing these things free, while the other companies have had to put up handsomely. But from June 11th the company will have to put up the regular charges for such privileges, according to the resolution which was passed in the council.

Mr. McCandless read a letter from the Board of Health, giving the results of its researches in Kewalo and asking that the Public Works Department take action as soon as possible to have the streets in that district raised to the established level. Mr. McCandless said that the streets in that district had not been accepted by the Department and will not be until they are raised to the proper level. The Government will back the Board of Health in its rules forbidding further building in the district until this work is done.

The Hilo Railroad Company sent in a request for permission to collect wood along their Waikae branch for 500 feet on either side of the track, but the Council decided to refuse permission. There is much dead wood along the road, but in and around it grows quantities of underbrush and if the wood were collected it would have a tendency to destroy this underbrush.

In the absence of instructions from Washington about the new wharves of the Cahu railroad, it was decided that the Territorial Government would have to take action so as to compel the company to so do its work of dredging that a road would be left to the cattle wharves clear.

Pump Will be Accepted.

The new pump at the high level station in Kalihi will be turned over to the city on Thursday next, it is expected. The preliminary run will be finished on Wednesday and unless something happens between then and now it will be accepted from the contractors. Andrew Brown, superintendent of waterworks, said yesterday that the pump had worked splendidly during the run under the direction of the contractors, and he thought that it would give perfect satisfaction.

SMALL BOY MAKES STEP IMPOSSIBLE

L. E. PINKHAM is an advocate of beautifying residence premises by removing the objectionable fences with which Honolulu is overburdened and which are an eyesore to admirers of landscape gardening.

He said yesterday, "Take away these unsightly fences which line the sidewalks, slope the lawns down to the sidewalk proper, and see what a vast difference there would be in the general appearance of our residence streets. Why, in many of the large Eastern cities and in California there is rarely a fence to be seen fronting on the street, and for blocks and blocks there is a clear stretch of green lawns in front of the houses, so that it is almost impossible to tell where one man's property line ends and the other man's begins."

"There are several places in Honolulu where the fences are conspicuous by their absence. The lawns grow out as far as the cement pavement and between it and the curbing. It is refreshing to see places of this kind."

Thomas Square is a notable instance where the removal of the fences, and sidewalk shrubbery being removed, have made a change in the general appearance of the park for the better. Many property-owners desire to make such an improvement as suggested by Mr. Pinkham, but there are difficulties in the way of achieving success.

To the average Portuguese boy unguarded property means a right to trespass. A lone mango tree when the fruit is ripe is not free from spoliation. The Portuguese boys infest the premises which afford easy access and can only be driven off by a liberal use of missiles. If fences were removed, no one's premises would be safe from their depredations. For this reason many residents have hesitated to tear down their fences.

MONTHLY MEETING HELD LAST NIGHT

Y. M. C. A. Board of Directors Arrange for the Future.

The board of directors of the Young Men's Christian Association met last night in its regular monthly meeting. Sixty-six new members were received, the largest number at any one time in the last three years, and this brings the total membership to something over 450, the largest it has ever been.

In the matter of improvements that were recommended by the physical committee for the enlargement of the locker room and new lockers, a committee was appointed to take the matter in hand and see if the money could be raised and if it can be gotten to go ahead with the work. The improvement is really one that is quite necessary to the proper work of the physical department. Mr. Coats, the physical director, now has a number of young men waiting for lockers before the gymnasium classes begin, and there is sure to be more demand for lockers when the classes open. The present locker room is too small for more lockers and is not well ventilated. This plan will give a room 21x8x31 and will give ample space for all the lockers and the baths in case the plunge can be put in later. It is hoped the friends of the institution will meet this need as they have done others in the past.

A committee was appointed to take up the work of arranging an exhibit to be sent to the International Convention at Boston, Mass., next June. This will include photographs of the different classes and samples of printed matter with statistics of the work in the past year. Great plans are being already made for this convention and it is hoped the Association will be able to go ahead of its exhibit at the last convention, which attracted so much attention and was desired by the International Committee for their collection. The work as it is opening up for the present gives promise of being the best for the Association, and if so, the showing will be very creditable.

The Juniors began their work in the gymnasium yesterday with a class of twenty-six, as large as the largest attendance of last year.

The Workers Bible Training Class will begin Friday evening at 6:30 o'clock.

The Triangle Literary Club met last night and elected officers for the ensuing year.

Triangle Club.

The Triangle Club held a meeting last evening at the Young Men's Christian Association. The principal business of the evening was the election of officers, which resulted as follows: J. E. Davis, president; John Lennox, vice president; Chas. Young, secretary; R. Weedon, treasurer; H. Looking, marshal.

The program for the evening was held over until next meeting and at 8:30 the meeting adjourned, as several of the members present desired to attend the Republican gathering at the drill shed.

Dry Goods

VELVET CUSHION COVERS, 25c to 40c each.
